

Marketing Funnel & Conversion Performance Analysis

Future Interns — Data Science & Analytics Internship
Task 3 | Track Code: DS | Repository: FUTURE_DS_03
Name: DEEPAK | CIN: FIT/MAY26/DS17671 | Date: 07/05/2026 – 07/06/2026

Total MQLs	Conversions	Overall CVR	Lost Leads	Avg Days to Convert
8,000	842	10.53%	7,158	48 days

01. Project Objective

Analyze real-world marketing funnel data from the Olist e-commerce platform to identify conversion drop-offs, channel performance, lead behavior trends, and provide actionable business recommendations.

02. Dataset Information

Detail	Information
Source	Olist Marketing Funnel Dataset — Kaggle
File 1	olist_marketing_qualified_leads_dataset.csv (8,000 records)
File 2	olist_closed_deals_dataset.csv (842 records)
Merge Key	mql_id (Left Join — all MQLs retained)
Period	June 2017 – June 2018
Final Shape	8,000 rows × 18 columns after merge

03. Technologies Used

Python 3.10+	Pandas	NumPy	Matplotlib / Seaborn	Plotly / Streamlit
Core Analysis	Data Cleaning	Numerics	Static Charts	Interactive Dashboard

04. Funnel Analysis & Channel Performance

05. Monthly Trend

06. Segment, Lead Type & Conversion Details

07. Key Insights

- **Critical Drop-off (89.47% lost)**
8,000 MQLs enter the funnel but only 842 convert. Nearly 9 out of 10 leads are lost — this is the single biggest bottleneck to fix.
- **Attribution Gap — Unknown Origin (13.7%)**
1,099 leads have no tracked source. This means 13.7% of marketing spend cannot be attributed. UTM parameters must be implemented immediately.
- **Organic Search = Volume, Not Quality**
Organic Search brings 28.7% of all leads (2,296) but conversion quality needs nurturing. A structured email sequence can significantly improve CVR.
- **Referral & Direct = High Intent**
Both channels show above-average CVR due to stronger purchase intent. These are low-volume but premium-quality sources worth scaling.
- **Home Decor & Health/Beauty Dominate Conversions**
Top segments: Home Decor (105), Health & Beauty (93), Car Accessories (77). Sales outreach should prioritize these categories.
- **Online Medium Lead Type = Best Performer**
Mid-size online sellers convert most reliably. SDR teams should focus on Online Medium and Online Big lead types for fastest close rates.
- **Resellers Drive 70% of Closed Deals**
587 resellers vs 242 manufacturers. The platform serves resellers better — creating manufacturer-specific onboarding could diversify the mix.

08. Business Recommendations

Priority	Action	Expected Impact
■ High	Implement UTM tracking for all campaigns	Recover 13.7% invisible attribution
■ High	Build email nurture sequences for organic leads	+2–4% CVR improvement
■ Medium	Launch formal referral/partner program	Scale highest-CVR channel
■ Medium	Focus SDR team on Online Medium + Big leads	Higher close rates
■ Low	Manufacturer-specific onboarding	Diversify business type mix
■ Low	Targeted campaigns: Home Decor & Health/Beauty	Target proven segments
